

Kirsch Rods Can't Sag—Never Tarnish

KIRSCH FLAT RODS

—For curtains and draperies

Curtains and Draperies are a necessity in every home. Get the most pleasing effects from them by using the Kirsch Flat Rod.

Every housewife is confronted with the problem of making her home beautiful. She is constantly alert for suggestions that will help her—will give her the name of being a careful housewife.

She spends her time, money and energy to get the finest lace curtains, novelty scrim curtains and draperies, for she knows that without them no home is complete. And yet, she often completely overlooks the fact the secret of a beautiful window lies—not in the curtains or draperies alone—but in the rod.

The Kirsch Flat Rod makes it decidedly easy for anyone to secure charming window decorations—the kind that convey the impression of having been executed by an expert.

You can now hang your curtains and draperies on Kirsch Flat Rods, and in addition to getting the latest and most pleasing effects, you know positively that they will not be soiled from a rusty rod. They look right until taken down—the curved ends give a pleasing effect and completely hide the fixtures.

There Kirsch is a Flat Rod to fit your windows in a color to match your woodwork or draperies.

Paint-Wise

is to paint when your property needs it. Paint-finish to wait for the price to go down.

But so many are foolish, they'll wait a good while. The whole rise in the cost of a job is 10 percent. The first year's drop won't be more than half that, more likely a quarter.

Waiting for 5 percent, more likely 24. The average job (with Devco) is \$50; 5 percent, \$2.50. Put it off for \$2.50? Guess not.

You think of that job as \$100. So it is with inferior paint.

Paint Devco; do it now, if your property needs it.—adv.
